Classes versus Locations

What's the difference?

Class tracking and locations are very similar inside QuickBooks. In fact, you will find both features under the same “Categories” tab inside settings.

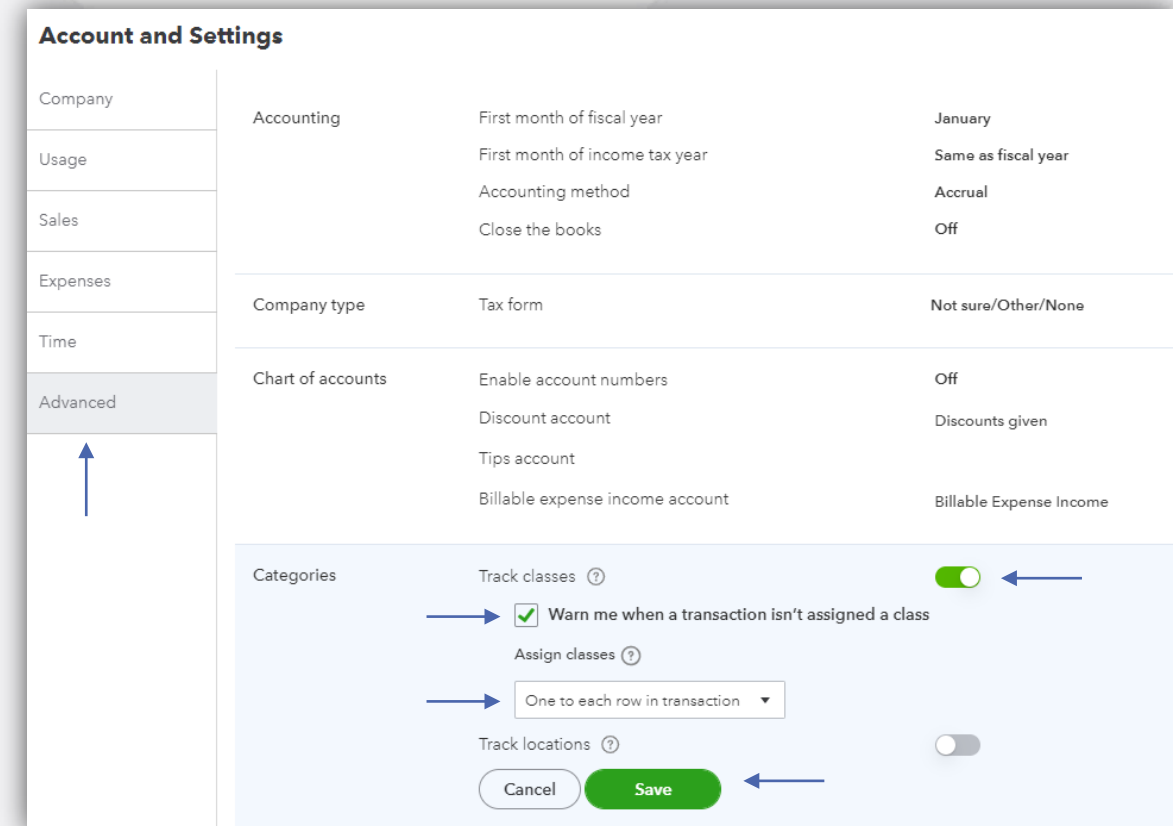

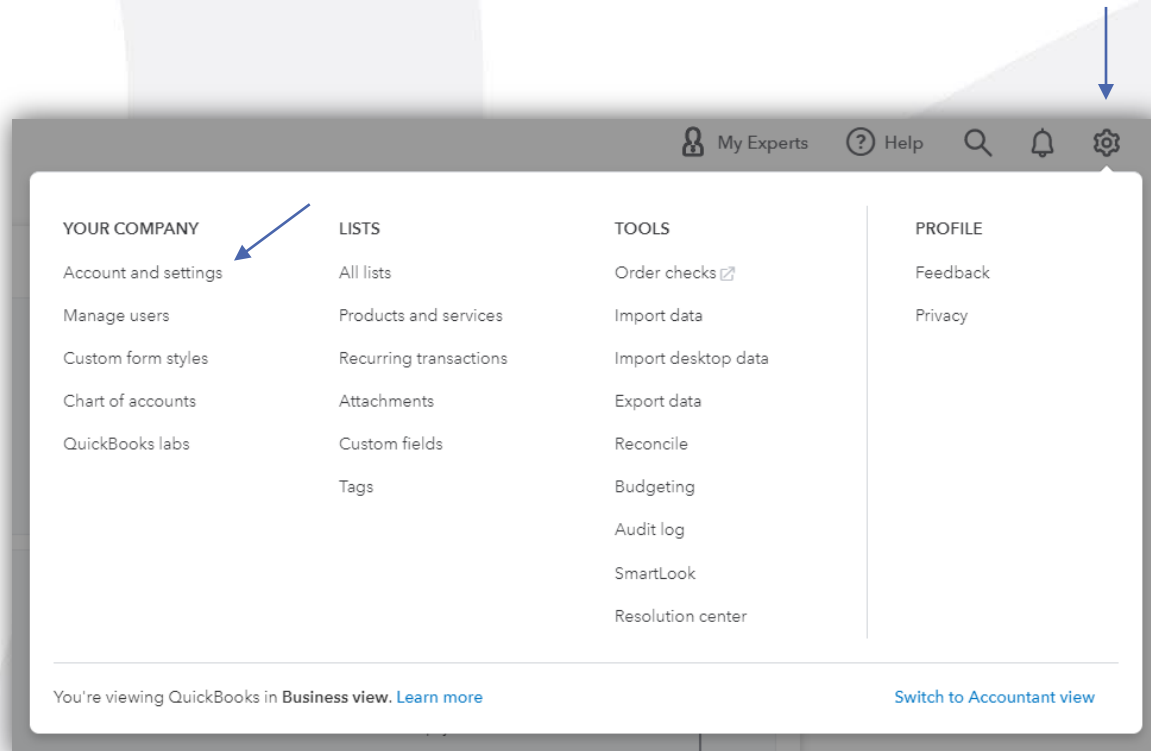

The main difference between the two is that you can select a different class per line item. However, only one location can be selected for an entire invoice, expense, or other transaction.

Locations and classes can be used in tandem. For instance, if you have multiple retail stores, you could assign each store as a location, and each department as a class.

Classes

Adds a Class field on forms so you can assign transactions to different segments like departments, locations, and product lines.

Consider these two options when enabling classes

Class tracking for transactions

When you turn on classes tracking, you have a few options when assigning a class to a transaction:

One to entire transaction: Assign one class to an entire invoice, receipt, or any other customer transaction. This saves you time if you don't need to track each product you sell by class.

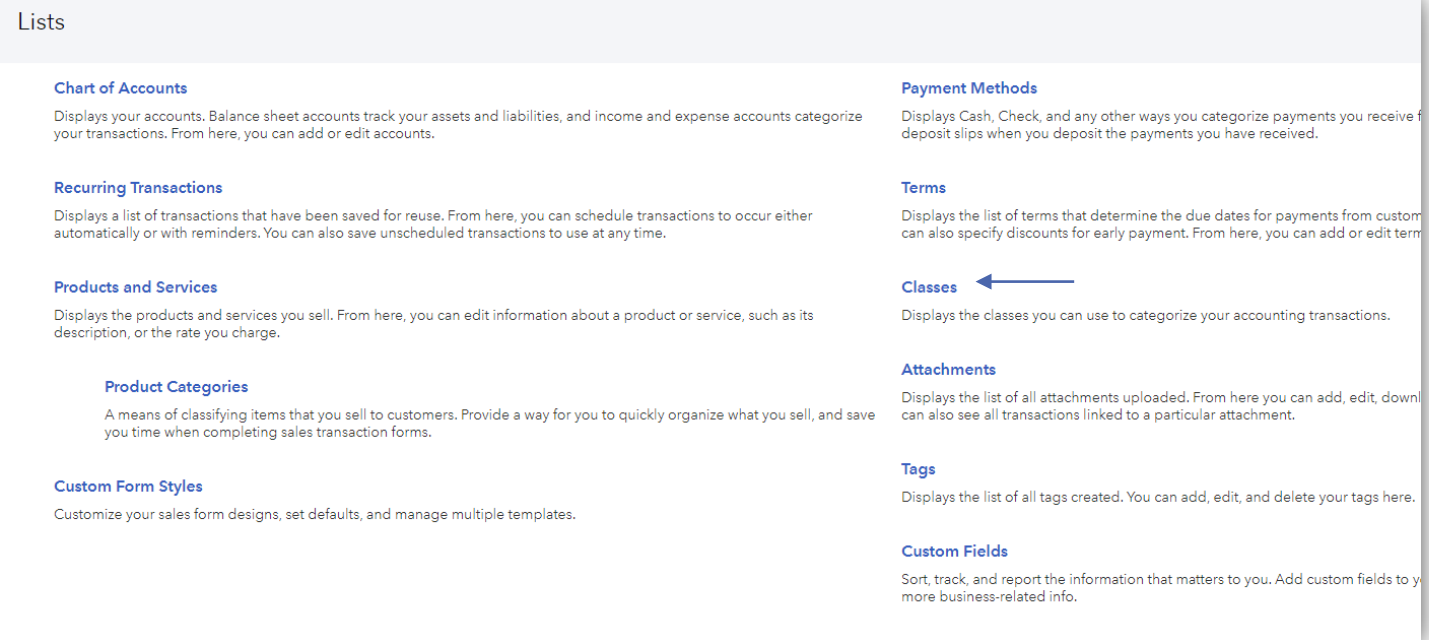

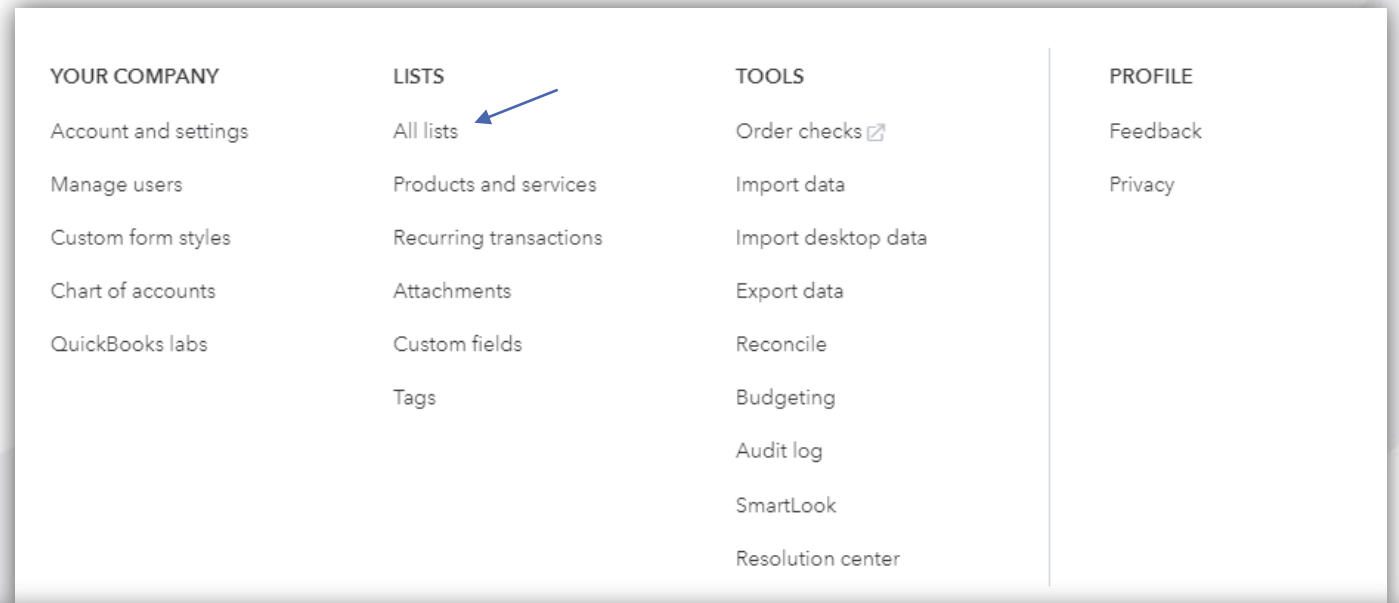

One to each row in transaction: Assign one class by line item on an invoice, receipt, or any other customer transaction. This gives you more in-depth reporting by class at the product and service level.

Add a class to a transaction

Here's how to assign a class for a row or for the whole transaction:

1. Select **+ New**.
2. Select the type of transaction you want to record.
3. Add the details of the transaction.
4. Assign a class:
 - To assign one to entire invoice or receipt, select the **Class ▼** drop-down at the top (if you set **One to entire transaction**).
 - To assign one to each item (or row), add the class in the class column (if you set **One to each row in transaction**).
5. Save your transaction.

Locate classes by clicking - Gear icon > All lists > Classes

Classes

< All Lists

Class List

The classes you use to organize transactions and line items.

Profit and Loss by Class

Your income, expenses, and net income (profit or loss) by class.

Purchases by Class Detail

Your purchases, grouped by class.

Sales by Class Detail

Your sales, grouped by class. Includes the date, transaction type, product or service, quantity, rate, amount, and balance.

Sales by Class Summary

Your total sales for each class (example: your sales by product line).

▼ QuickBooks Online Essentials

- **Billable users:** 3 users.
- **Non-billable users:** 2 accountant firm users. Unlimited time tracking only users. Reports-only users are not available for this subscription.
- **Classes and locations (combined):** Not available for this subscription.
- **Chart of accounts:** Maximum of 250 accounts.
- **Tag groups:** Maximum of 40 groups.
- **QuickBooks Commerce Accounting:** Maximum of 3 sales channels connected

▼ QuickBooks Online Plus

- **Billable users:** 5 users.
- **Non-billable users:** 2 accountant firm users. Unlimited time tracking-only and reports-only users.
- **Classes and locations (combined):** 40 combined classes and locations.
- **Chart of accounts:** Maximum of 250 accounts.
- **Tag groups:** Maximum of 40 groups.
- **QuickBooks Commerce Accounting:** unlimited sales channels can be connected

▼ QuickBooks Online Advanced

- **Billable users:** 25 users
- **Non-billable users:** 3 accountant firm users. Unlimited time tracking-only, and reports-only users.
- **Classes and locations:** Unlimited classes and locations.
- **Chart of accounts:** Unlimited accounts
- **Tag groups:** Unlimited groups
- **QuickBooks Commerce Accounting:** unlimited sales channels can be connected

Classes allow you to see income and expenses for different revenue streams in a business.

They work best for creating a Profit & Loss (Income Statement) report with comparison columns.

Locations

Adds a Location field on forms so you can assign transactions to different locations like stores, sales regions, and counties

There are various options other than the word “location” when enabling

- Business
- Department
- Division
- Location
- Property
- Store
- Territory

Locate locations the same way you would find classes

Location List

A list of your business locations.

Profit and Loss by Location

Your income, expenses, and net income (profit or loss) by location.

Purchases by Location Detail

Your purchases, grouped by location.

Sales by Location Detail

Your sales, grouped by location. Includes the total unit and sales amounts for each location.

Sales by Location Summary

Your total unit and sales amounts for each location.

Locations, also found in Online Plus and Advanced, allow you to examine the financial resources behind transactions.

They work well as columns on balance sheet reports.

TOTAL						\$700.00	\$700.00

A decorative curved line in a light blue-grey color, starting from the bottom left and curving upwards and to the right, separating the white background from the dark blue background.

What are the drawbacks?

Most transactions do not offer the location feature and the ones that do only allow for one location.

They are not useful for expenses across multiple sites and are also limited to 40 within the Plus subscription.

Job Tracking (Costing) and Projects

Connecting a project/customer to the related costs

Make sure track expenses and items is turned on

Found within account and settings
Expense tab

Turn on Projects within the Advanced tab

The image shows two overlapping settings panels from a software application. The top panel is titled 'Bills and expenses' and contains several toggle switches and checkboxes. The bottom panel is titled 'Projects' and contains a single toggle switch. Both panels have 'Cancel' and 'Save' buttons at the bottom.

Bills and expenses

- Show Items table on expense and purchase forms ☒ ?
- Show Tags field on expense and purchase forms ☒ ?
- Track expenses and items by customer ☒ ?
- Make expenses and items billable ☒ ?
 ☐ Markup with a default rate of 0.00 % ?
 ☒ Track billable expenses and items as income ?
 ☒ In a single account
 ☐ In multiple accounts ?
 ☐ Charge sales tax ?
- Default bill payment terms ▼

Projects

- Organize all job-related activity in one place ☒ ?

Live Examples

Job Costing and Project Takeaways

The best way to use Projects with employees, is when the payroll feature is utilized within QuickBooks.

If you use a third-party provider, it is possible to calculate an hourly cost rate however it is a manual process. This is time consuming and not usually a true hourly cost rate.
